

TISAX Price List

You can choose between the two payment models below:

TISAX Assessment Based Charges (ABC) Payment Model (default)

The ABC payment model covers all fees related to processing and handling of the Registration of one TISAX Assessment Scope. In this payment model, access to other TISAX Participant's assessment results requires an own valid and shared TISAX assessment result.

ABC is the standard TISAX payment model and applicable unless you opt for the PBC payment model. Each Registration of an TISAX Assessment Scope will be invoiced individually. Beside the ABC TISAX Scope Registration fees, the TISAX Participation is free of charge.

Choosing the TISAX ABC payment model has the following advantages:

1. You pay exactly what you register. The registration fee for each TISAX Assessment Scope is based on the number of locations covered by it leading to low fees for small TISAX Assessment Scopes.
2. The fees cover the entire validity of an TISAX assessment for the registered TISAX Assessment Scope. No additional recurring fees will occur.

We will invoice the TISAX ABC for a TISAX Assessment Scope after the approval of an TISAX Assessment Scope.

Item	Payment Description	EUR
9011	Assessment Based Charges (ABC-model) per scope	405,00 per location
9013	Assessment Based Charges (Location Independent)	8.000,00 per scope

Discounts

Item	Description	Amount
9011	ABC-model for 5 – 9 locations within a scope	10% per location
9011	ABC-model for 10 – 14 locations within a scope	20% per location

Our Terms of Payment:

- The payment is a prerequisite for the acceptance of an application.
- Payments are due 30 days after the date of the invoice.
- All fees are subject to German value added tax (VAT) as far as applicable.

TISAX Participation Based Charges (PBC) Payment Model (optional)

The TISAX PBC payment model covers all fees related to processing and handling of the TISAX Participant's registration. It includes an applicability check of ENX Association without the need of a valid and shared TISAX assessment result.

The PBC payment model is a replacement for the ABC model. It will cover all further scope registration related fees.

Choosing the TISAX PBC payment model has the following advantages:

1. After successful applicability check, you can access TISAX assessment information of other TISAX Participants without prior sharing of an own TISAX assessment result.
2. You can register an arbitrary number of TISAX Assessment Scopes and locations without additional fees.
3. You do not need to process individual invoices per scope registration and know the exact costs from the start.

We will invoice the TISAX PBC annually in January. When choosing the PBC model during the year, we will charge 1/12 of the annual fee for each month including the one the charging model was selected until end of the year.

Item	Payment Description	EUR
9014	Participation Based Charges (PBC Model)	5.000,00 per year

Discounts

Item	Description	Amount
9014	Participation for ENX board members (including daughter companies). Please inform us, if applicable.	100%
